

Household Hazardous Waste

DID YOU KNOW...

Each year thousands of dogs and cats are poisoned by improperly discarded or leaking antifreeze? The sweet taste attracts pets.

What are Household Hazardous Wastes (HHW's)?

Many products we use in our homes and routinely throw away with our trash are considered HOUSEHOLD HAZARDOUS WASTES. These products are similar to regulated hazardous wastes produced by business and industry. Products which are corrosive (such as acids and alkalis), flammable, reactive or toxic (poisonous) can be found in most homes, garages and workshops. These products pose risks if used, stored or disposed of improperly. Consider using less hazardous products instead.

Tip: Use white vinegar, salt and water for surface cleaning and baking soda as a toilet cleaner.
